EXPERIENCE

VAN THANH MEDICAL INVESTMENT JOINT STOCK COMPANY

Dec 2025 – Present

System Administrator

Bien Hoa - Dong Nai, VN

- Performed **backup and restore operations** for **SQL databases**, ensuring data integrity and availability.
- Administered **Synology NAS**: user account provisioning, access control, shared folders, and storage management.
- Troubleshoot and resolved **network and infrastructure issues** to maintain stable system operations.
- Managed **domains, hosting services, and physical servers**, including configuration and monitoring.
- Provided **end-user support**: handled system, software, and access-related incidents promptly.

HQSoft

Jul 2025 – Dec 2025

System Engineer

Ho Chi Minh, VN

- Managed and monitored **cloud infrastructure** on **VNG Cloud, CMC Cloud, and AWS**.
- Assisted in deploying IT services: **CDN, Cloud servers (Public/Private), mail server, SSL, domains**.
- Monitored and maintained internal systems with tools like **Zabbix, Prometheus, CheckMK, Uptime Kuma**.
- Managed **Active Directory** environment: OU organization, email account provisioning, and user access policies.
- Administered **database systems**: performed backup/restore operations and managed user access control.
- Supported backup solutions, security policies, and IT operations for internal teams and clients.
- Explored **Virtualization** technologies and contributed to infrastructure stability.

ITL Corporation

May 2025 – Jul 2025

IT Support Intern

Ho Chi Minh, VN

- Troubleshoot hardware, software, and network issues for office users, ensuring minimal downtime.
- Performed IT asset management: inventory tracking, device setup, and preventive maintenance.
- Assisted with network administration tasks such as user account management, access control, and incident handling.
- Collaborated with the IT team to monitor system performance and respond to service requests promptly.

EDUCATION

University of Information Technology, VNU-HCM

Sep 2022 – 2025

B.S. in Computer Network and Data Communication, Graduated with Very Good Classification, GPA: 8.34/10 HCMC, VN

SKILLS

Programming: C/C++, C#, Java, Python, Bash scripting

DevOps & Tools: Git, GitHub, Docker, Kubernetes, CheckMK, Zabbix, Prometheus

Cloud Platforms: AWS, Google Cloud Platform (GCP)

Databases: SQL Server (backup/restore, user roles), PostgreSQL

Soft Skills: Teamwork, Problem-solving, Communication, Agile practices

Languages: English (B2 VSTEP, TOEIC 610)

PROJECTS

SDN Monitoring & Intrusion Detection System

Oct 2025 – Dec 2025

- Developed a security monitoring system for SDN using Suricata IDS integrated with centralized logging and visualization tools.
- Processed Suricata logs and alerts, orchestrated monitoring stack using Docker Compose (Prometheus, Grafana, Loki).
- Built real-time Grafana dashboards for intrusion detection, traffic analytics, and system performance monitoring.
- **Tech Stack:** Suricata, Prometheus, Grafana, Loki, Docker Compose, Linux, SDN/OpenFlow

SDN Congestion Management System

Feb 2025 – May 2025

- Built a simulated SDN network using Mininet on Linux to monitor real-time traffic behavior.
- Collected and processed network metrics to train Machine Learning models for congestion prediction.
- Evaluated model performance and integrated results into SDN workflow for proactive congestion awareness.
- **Tech Stack:** Mininet, Ryu Controller, OpenFlow, Python, LSTM, Linux

Zabbix Network Monitoring System

Jan 2025 – Mar 2025

- Implemented system and bandwidth monitoring in a simulated VMware network with inter-VLAN routing.

- Integrated Zabbix Server (Ubuntu 22.04) with SSH-based monitoring scripts for traffic, CPU, RAM, and active connections.
- Visualized performance metrics and optimized network operations based on monitoring insights.
- **Tech Stack:** Zabbix, VMware, DD-WRT, Ubuntu Linux, VLANs, Shell Scripting

Enterprise Network Design

Oct 2024 – Dec 2024

- Designed and deployed scalable enterprise network architecture using OSPF, HSRP, VPN, ACL, DHCP, and WLAN.
- Enhanced network security with VPN tunneling and ACL-based access restrictions.
- Implemented redundancy using HSRP to ensure service continuity and high availability.
- **Tech Stack:** Cisco Routers/Switches, OSPF, HSRP, VPN, ACL, DHCP, WLAN
